

Chalece DeLaCoudray

LEARNING EXPERIENCE DESIGNER · TECHNOLOGIST · ATLANTA, REMOTE

I make complex technical concepts **click**.

Ten years turning complex technical content into learning people actually finish and use. Seven published Coursera courses, 30,630+ learners. M.S. Music Technology, Georgia Tech.

— FEATURED WORK

Proof, not promises.

A decade of turning complex technical ideas into learning and systems that ship. Public work links out where it lives.

Coursera Course Catalog (Codio)

Authored 7 published courses on DevOps, containers, CI/CD, operating systems, Unix, Bash scripting, and web security, reaching 30,630+ learners.

Curriculum

Creative Coding Summer Cohort

Designed and ran a Python and Pygame creative coding summer cohort for two years, guiding high school juniors to college freshmen through game development to final group and capstone project presentations.

Python + Pygame

Game Dev

Cohort

Your Voice Is Power ↗

Curriculum and coding competition with CEISMC, Amazon, Georgia Tech, and Pharrell Williams' YELLOW, connecting computer science, music, and equity on the EarSketch platform. Published in the IEEE RESPECT and ASEE conference proceedings.

Equity

Published

Music Tech Workshops at Georgia Tech

Returning contractor for three years, leading annual EarSketch and music technology coding workshops and student panels for high school students at Georgia Tech, introducing computer science through music.

Teaching

Workshops

Music + Code

Audio Programs for Amazon Amp

Led Audio Quality and Hardware Compatibility programs for Amazon Amp, Amazon Music's live audio streaming app, across 50+ device combinations and 1,200+ test scenarios. Stood up a testing lab.

— ABOUT

Hi, I'm Chalece.

I am a learning experience designer and technologist who turns complex, technical material into learning that sticks. I started in audio engineering and studio operations, earned a B.A. and an M.S. in Music Technology from Georgia Tech, where my graduate research used music to help toddlers build early literacy, and built a decade-long career around one idea: that hard things become learnable when you design for the learner, not the spec.

At Codio I authored seven published Coursera courses, on DevOps, containers, CI/CD, operating systems, and more, reaching over thirty thousand learners. At Amazon Music I led technical programs and stood up the systems behind them. Along the way I co-founded an athletics-development venture, mentored young coders, published research at ACM CHI, and work fluently with AI tooling to prototype and ship faster.

I care about clarity, accessibility, and craft. If you have something complex that people need to understand, I can help them get there.

SKILLS SNAPSHOT

Learning experience design

Curriculum and assessment

Adult learning (ADDIE, Bloom's)

Technical content (DevOps, OS, CI/CD)

AI tooling and prototyping

Storytelling and short-form video

Photography and graphic design

UX and WCAG accessibility

Python, JavaScript, HTML/CSS

Program management

— RESUME

The short version.

The full history, formatted for ATS, is one click away.

- ✓ Seven published Coursera courses on DevOps, OS, CI/CD and more, 30,630+ learners reached.
- ✓ M.S. Music Technology, Georgia Tech (3.75 GPA), plus a B.A. from Georgia Tech.
- ✓ Led Audio Quality and Hardware Compatibility programs at Amazon Music.
- ✓ Published research at ACM CHI 2020, with practical AI-tooling proficiency.
